Education

Sinhgad College of Engineering, Pune CGPA: 8.7
Bachelor of Engineering in ENTC *2024-2027*

Sou. Venutai Chavan Polytechnic 84.51%
Diploma in Electronics and Telecommunication Engineering *2022-2024*

Experience

IoT Development Intern Jan. 2026– Feb. 2026
Incubators System *Pune, Maharashtra* *Pune*

- Developed IoT-based solutions by integrating hardware components, sensors, and software systems.
- Integrated AI capabilities into IoT applications to enhance automation and intelligent decision-making.
- Worked on hardware-software communication, testing, debugging, and system validation.

Projects

Business Entity Resolution – Amazon ML Challenge 2026 Sep 2026
Technologies: *Python, Pandas, PyArrow, scikit-learn*

- Built a record-matching pipeline linking ~1.7M reference businesses to ~10M records from two noisy sources (US, India, France), using only the provided data.
- Wrote Unicode-aware normalization for multilingual text (Devanagari, Tamil, Bengali) and fixed a tokenization bug that split Hindi words at combining marks.
- Built blocking on name, address and bigram keys with frequency capping (83% recall on India training data), and processed 100M+ candidate pairs in chunks under a 12 GB RAM limit.
- Trained a logistic regression matcher on name/address similarity features. Public leaderboard score: 0.65 (F0.5).

VisionX – AI Smart Rover with Robotic Arm 2025-26
Technologies: *Python, OpenCV, NumPy, Raspberry Pi, Computer Vision, Robotics, IoT, Git, GitHub*

- Developed an AI-powered smart rover with robotic arm functionality for autonomous navigation.
- Implemented object detection, obstacle avoidance, and live camera monitoring using Computer Vision.
- Integrated Raspberry Pi with sensors and camera modules for real-time processing.
- Optimized navigation and robotic arm control for autonomous operation.

LearnAge – AI Powered School Management & Learning Platform 2025-26
Technologies: *React.js, Python (Flask), MySQL, Firebase, HTML, CSS, JavaScript, REST API, Git, GitHub*

- Developed a multi-user EdTech platform with Student, Parent, Teacher, and Admin dashboards.
- Built attendance tracking, homework management, academic monitoring, and notification modules.
- Developed REST APIs for seamless communication between the frontend and backend.
- Integrated Firebase services for real-time data synchronization and notifications.

Technical Skills

- **Programming Languages:** Python, Java, SQL, JavaScript
- **AI/ML:** Machine Learning, Deep Learning, Computer Vision, Natural Language Processing (NLP), Generative AI
- **Frameworks & Libraries:** TensorFlow, OpenCV, NumPy, Pandas, Scikit-learn, Flask, React.js
- **Databases:** MySQL, Firebase
- **Web Technologies & APIs:** HTML, CSS, JavaScript, REST APIs
- **Cloud & AI Services:** Google Gemini API, AWS S3, Firebase
- **Developer Tools:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Postman
- **Deployment & DevOps:** Docker, Vercel, Render, JWT

Certifications & Achievements

- **3rd Prize — CREDENZ '25**, PICT IEEE Student Branch | Feb 2025
- **Generative AI Course** — Certificate of Completion
- **Python Course** — Certificate of Completion
